Our automated, investigative software solution to support your investigations in social networks.

The SNH Titan provides the functionality of the Social Network Harvester (SNH) Classic and expands it in many areas. In addition, the user experience has been completely redesigned based on comprehensive user feedback and the latest web technology. The SNH Titan is therefore the successor of the SNH Classic and will replace it by 2025.

All purchased SNH Classic licenses will receive full support during the license duration.

The SNH Titan Desktop is the counterpart to the existing SNH Classic. It allows you to save data locally on your PC. Collaboration with other SNH Titan users is possible via an export and import of the project. You can run up to three data collection processes simultaneously in the background.

SNH Titan Desktop

- 1 Runner
- 1 User
- Portable case
- Analytics platform
- Unlimited data collection

4.500 €

Annual license

SNH Titan Desktop+

- 3 *Runners*
- 1 User
- Portable case
- Analytics platform
- Unlimited data collection

5.300 €

Annual license

With SNH Titan Enterprise, you can collaborate on cases and collect and visualise data within or across departments. The SNH Titan Enterprise version will be set up as an on-premise solution within your infrastructure in collaboration with your IT department.
