

Digital Intelligence Ultra Bay 4 Portable™

DESKTOP FORENSIC WRITE BLOCKER

Portable Universal Write Blocker for Field and Lab Use

The Digital Intelligence UltraBay 4 Portable ("UltraBay 4P") supports forensic data acquisition of SATA, SAS, USB 3, PCIe, FireWire, and IDE storage devices. Packaged in a compact, fan-ventilated, durable aluminum enclosure, the UltraBay 4P provides forensic examiners a complete set of write blockers for lab or field use. The UltraBay 4P is easy to use and delivers great forensic imaging performance. A single power supply connects to the rear of the UltraBay 4P and drives both the enclosure (vent fan cooling) and suspect devices. The USB 3 SuperSpeed host computer connection ensures maximum imaging speeds when using high-performance software imaging applications. For maximum speeds, the Tableau Imager ("TIM") software is recommended.

UltraBay 4P Will Increase Your Forensic Imaging Capability

Whether you image with a forensic workstation or a laptop such as the Digital Intelligence FRED™ or FRED-L™, you'll get more work done by adding UltraBay 4P's to your process. A USB 3 connection is all that's required to connect one or more UltraBay 4P's to your imaging configuration. Running parallel imaging jobs has never been easier. With UltraBay 4P's in the mix, you'll acquire evidence faster than ever before.

The UltraBay 4P Includes All Moderns Adapters and Accessories

Digital Intelligence takes the guess work out of purchasing and using write blockers. A complete set of modern adapters, cables, and power supply is kitted with the UltraBay 4P. Buy in confidence knowing you are ready for a broad array of forensic imaging challenges. From SATA drives to USB 3 to Apple Macs™ to non-standard form factor PCIe-based SSD's, the UltraBay 4P gets the job done.

The UltraBay 4P is available for purchase from the Digital Intelligence Webstore (www.digitalintelligence.com/store) or from our authorized channel partners in Canada, Europe, and the United Kingdom (www.digitalintelligence.com/resellers). Visit the Digital Intelligence website (www.digitalintelligence.com) for more information on the UltraBay 4P.
